

DGM 2000 / 3000

DGM steam disinfectors are created for large-scale disinfection of mattresses, pillows, blankets in bed-changing, medioprofilactic institutions of various specialization, centralized laundries, care centers and other departments where steam disinfection is needed. DGM steam chambers are manufactured to meet the world`s toughest standards of quality and safety.

- Single or double-door version.
- Compact design using an external steam generator allows for a centralized steam supply.
- Suitable for floor level installation.
- User-friendly: 7" LCD display, 5 integrated disinfection programs.
- Safety: chamber door cannot be opened when chamber is pressurized, a cycle cannot start if the door is open or not properly locked, direct and indirect steam.
- Complete set composition: transport trolleys, loading cart, water softener, air compressor, external steam generator, built-in printer.
